REMARKS

Claims 1 and 18 have been amended. Claims 2, 4-17, 19-29 have been canceled. No new matter has been added. Claims 1, 3 and 18 remain in the application for examination. Reexamination and reconsideration is respectfully requested.

In the paper mailed 01/31/2007, claims 1, 3-5, 16, 18, and 19 were rejected under 35 U.S.C. § 102(b) as anticipated by Japanese Application Publication No. 11-252322 (Washizu). Applicant traverses with respect to claim 4. Claims 1 and 18 have been amended to specify that the photosensor array is attached to a flexible drive member, and that the two-dimensional path of movement is defined by the flexible drive member. In Washizu, the path of movement defined by the cable is single dimensional. That is, the sensor array may move in two dimensions, but only one of those dimensions is determined by the cable.

Entry of this amendment is respectfully requested. This application is considered to be in condition for allowance and such action is earnestly solicited.

Respectfully submitted,

by A. W. Winfield
